

Professor Roland Glowinski

March 9, 1937 - January 26, 2022

Beloved brother, husband, father and grandfather, Roland Glowinski was born March 9th 1937 in Paris, France, the first child of Anna and Nathan who had left their native Belarus and Poland as waves of antisemitism were rising in Eastern Europe. Roland, his mother and brother Albert survived World War II thanks to the friendship of their mother Anna with the Botineaus, a selfless and courageous Christian family from Sarge-sur-Bray in the Loir et Cher area of France. For their heroism, the Botineau family was recognized as Righteous among the Nations by Yad Vashem in Jerusalem in 2005. You can read about the story and see photos of Roland and Albert with the Botineau family during WWII on the Yad Vashem website at: Botineau Madeleine ; Son: Roger ; Daughter: Lucas Madeleine (Botineau) (yadvashem.org). After the war, Roland and his family returned to Paris, reuniting with his father Nathan who had been a prisoner of war in Germany. Roland and his family always remained deeply connected with the Botineau family. On the instigation of his mother, Roland visited Israel for the first time at 19, where he met his wife-to-be Angela, a good friend of a niece of Anna. Roland and Angela married in 1963 at Paris' Great Synagogue on Rue de la Victoire, with Rabbi Choukroun (later the Chief Rabbi of Paris) officiating. They later had two daughters Anne and Tania. Going back to their childhood, Roland and his brother Albert excelled in school. They won admission into the elite Ecole Polytechnique, one of the two most exclusive scientific institutions of higher learning in France. Ecole Polytechnique was a military school and Roland served

honorably as a French officer in the Algerian War. After Ecole Polytechnique, Roland obtained a diploma in Electrical Engineering from the Ecole Nationale Supérieure des Telecommunications and secured a job as an engineer for the French Broadcasting Authority. While working full-time as an engineer and encouraged by the great Professor Jacques-Louis Lions, his thesis advisor and lifelong mentor, Roland obtained his Doctorat d'Etat in Mathematics from the Université Pierre et Marie Curie (Paris VI) in 1970. Then began a very illustrious Mathematician career for Roland. Roland was awarded a professorship at the University of Paris VI in 1970 and also worked as a scientific director for INRIA, the National Institute for Research in Digital Science and Technology (Institut National de Recherche en Sciences et Technologies du Numerique). Quickly rising to great renown, Roland collaborated with mathematicians from all over the world and was invited to spend summers as a visiting professor at various international universities such as Stanford University, the University of Rio de Janeiro and the University of Madison-Wisconsin. Roland also participated in "scientific diplomacy" as part of a select group of French mathematicians and dignitaries who traveled to Russia in the 70s to start a scientific collaboration with Russian mathematicians in the midst of the Cold War. He was part of a similar group of French scientists traveling to China in 1981 and selected to participate in a scientific mission to India in 1982, led by French President François Mitterrand. By the mid-80s, Roland was well established as one of the leaders in applied mathematics and scientific computing worldwide. In 1985 Roland took a position as the Cullen Professor of Mathematics at the University of Houston. He continued his illustrious applied mathematics career in the US and the world, regularly participating in conferences, lecturing, teaching, mentoring, researching, and publishing. He authored or co-authored 10 scientific books, as well as over 450 scientific papers. His awards and distinctions throughout his career include: -Silver Medal of the City of Paris, 1980 -Officer of the French Order of the National Merit, 1987 -Member, Academia Europaea, 1988 -Laureate of the Seymour Cray Prize-France, 1988

-Laureate of the Grand Prix Marcel Dassault of the French National Academy of Sciences, 1996 -Knight of the French Order of the Légion d'Honneur, 1998 - Member, French National Academy of Technology, 2000 -Laureate of the SIAM Theodore Von Kármán Prize, 2004 -SIAM Fellow -Fellow of the American Mathematical Society -Honorary Doctor, University of Jyväskylä, Finland, 2004 -Member, French National Academy of Sciences, 2005 - Computational Fluid Dynamics Award, US Association for Computational Mechanics, 2011 -2020 W.T. and Idalia Reid Prize from the Society for Industrial and Applied Mathematics In addition to his position at the University of Houston, Roland also held various formal, adjunct, visiting and honorary professorship roles with universities all over the world, including: -Honorary Professor, Fudan University, China -Fairchild Distinguished Visiting Scientist, California Institute of Technology, 1988/1989 -Adjunct Professor of Computational and Applied Mathematics, Rice University, 1986-present - Docent Professor of Computational and Applied Mathematics, University of Jyväskylä, Finland: 2001-present -Assistant, Associate, Full and Distinguished Professor of Mathematics at University Pierre and Marie Curie (Paris VI): 1970-2000. Emeritus Professor since 2000. -Lecturer in Computational and Applied Mathematics at Ecole Polytechnique, Paris, France: 1968- 1985 - Visiting Professor, University of Tennessee at Knoxville, 2008 -Visiting Professor, Hong Kong University of Science & Technology, 2008-2015 - Visiting Professor, Hong Kong Baptist University, 2015

Aside from his passion for mathematics Roland had many hobbies and interests. He developed a keen fascination for astronomy at a young age as well as science fiction, drawing pictures of stars and planets as a child. He could always be found devouring one or several books at the same time. He grew a passion for fishing from his other mentor, Roger Lucas, the husband of Madeleine Botineau. Most of all, Roland was dedicated to his family and his dear wife of 58 years, Angela, his strongest supporter and cheerleader throughout his career. Finally, Roland was known, in the applied mathematics community,

among his friends, his family members and all who met him for his unique love of others, kindness, empathy and compassion. He was truly highly loved and respected by everyone. He will be missed dearly and is profoundly grieved. He is survived by his wife Angela, brother Albert Glowinski, daughters Dr. Anne Glowinski and Tania Glowinski Gonzalez, grand-children Jacques, Théo, and Sammy Fehr, Joshua and Eliora Glowinski Gonzalez, sons-in-law Jim Fehr and Juan Gonzalez and nephews Julien and François Glowinski.

“ C'est une bien triste nouvelle que celle du décès de Roland. J'adresse mes sincères condoléances à Angela et toute la famille. Je connaissais Roland depuis mes débuts à l'Inria (IRIA à l'époque) dans le groupe d'Alain Bensoussan. Je n'ai eu que quelques occasions de le voir après son établissement à Houston, notamment au congrès du 70^{ème} anniversaire de J.L. Lions, mais je garde la mémoire non seulement du mathématicien renommé mais aussi d'un collègue d'une solidité inébranlable.

“ Roland was a great man in all respects, a scientific example to be followed, humorous yet frank and to the point, warm, accessible and available to discuss various aspects, a steadfast support of his family and of his friends. He deserves our admiration.

I wish Angela, his daughters to whom he was so attached, his son-in-laws and grandchildren, consolation in the knowledge that he led a great life amongst you, and was an example in all respects for the scientific community

“ *Bien Chère Angela,
C'est avec une grande tristesse que j'ai appris le récent décès de Roland.
Il était pour moi l'un des piliers fondateurs de l'IRIA/INRIA et l'initiateur du Code d'Éléments Finis Modulef. J'ai toujours trouvé en lui une écoute très attentive, d'excellents conseils et une approche extrêmement constructive des différents aspects de la recherche que ce soient les fondamentaux, les applications et la diffusion dans le monde entier.
Plus tard, lorsque j'ai migré au Pôle Universitaire Léonard de Vinci, il m'a très significativement aidé à monter
- le Master de Calcul Scientifique,
- puis l'École Supérieure d'Ingénieurs Léonard de Vinci
et à asseoir ces formations/recherches dans le cadre national et international. Je lui en suis très reconnaissant.
Au-delà de ces contributions liées au travail, j'ai beaucoup apprécié ses grandes qualités humaines, son humour et sa très bonne humeur.
Je n'oublie pas nos rencontres, oh combien chaleureuses, lors de missions internationales aux États-Unis, en Espagne et nos deux semaines inoubliables passées dans une Chine renaissante en 1981.
C'est pourquoi, je m'associe à ta peine et à celle de toute ta famille en espérant que tu puisses retrouver une certaine sérénité dans les mois qui viennent.
Reçois mes très chaleureuses amitiés

“ J'ai suivi les cours de Roland Glowinski en 1974 à l'université Paris VI. Je suis ensuite rentré à l'IRIA et j'ai été affecté à son projet. Il a donc tenu un rôle principal dans ma formation initiale et je lui dois une bonne partie de ce que je sais en mathématiques appliquées.

Avec Alain Bensoussan il a hautement secondé Jacques Louis Lions dans le virage des années 70 pour faire évoluer les mathématiques françaises, d'un très haut niveau mais très abstraites vers une mise en œuvre sur des problèmes concrets. Cela s'est fait en gardant une approche scientifique rigoureuse et c'est encore la marque de l'INRIA aujourd'hui. Il a donc fortement marqué les mathématiques appliquées.

Nous nous sommes à nouveau rapprochés récemment par l'intermédiaire d'Angel Manuel Ramos : j'ai dirigé sa thèse à l'INRIA puis il a fait un stage postdoctoral à Houston avec Roland Glowinski. Je sais qu'il avait gardé un attachement très sincère avec lui .

Je présente mes très profondes condoléances à son épouse et à sa famille.

“ Dear Family, Friends, and Colleagues of Professor Roland Glowinski,

The breaking news of decease of Roland hit me and my wife here in Finland, Jyväskylä, yesterday. Our hearts are with Roland's family. In addition to multiple scientific breakthroughs due to joint work with Roland, our shared fishing trips here in Finland bring bright and happy memories which do not fade away. When Roland was nominated as the Honory Doctor of the University of Jyväskylä, me and my wife had the honor to host Roland and Angela. During this visit, before the actual ceremony, we went to fishing with Roland to the nearby rapids in Laukaa. And we were surprised to find out that our fishing guide and oarsman was actually a physician! We were extremely lucky that we shared the professional company of Doctor-Timo, who lived over hundred miles away from the rapids but wanted to support keen fishermen, also twice after this first encounter during later visits. To conclude, we are ever grateful that we had the privilege to be acquainted with the Scientist and Human Roland Glowinski.

“ It is sad to hear just now that Professor Roland Glowinski passed away. I known him since 2016 and after that I turned my research to ADMM (it was originally proposed by Professor Glowinski and Gabay et al.) and its variants. I remembered at first time to ask him some questions about ADMM by email and quickly Professor Roland Glowinski sent me an email to answer my concerns. He is so nice to a stranger. His death is a big loss to the optimization community of the world.

Best wishes,
Jianchao Bai

Jianchao Bai - January 29, 2022 at 05:53 AM

XT

“ I was still communicating with Roland and working together on project with him just some days ago. It was such a nice experience to communicate and work with Roland. We are planning to have Roland to visit Hong Kong Baptist University in the summer. It was a shock and a a very sad feeling when I heard about this. We will also miss Roland. Such a great mathematician, such a nice friend and such a good person.
